

QualityAI Audit Manager

2026 Summer Release Webinar

Karoly Kali, June 2026

Your Presenter

QualityAI Solution Partner

Karoly KALI (“Karesz”)

- 18 years in automotive across 5 continents
- 15 years in quality, plant floor, production, and operational excellence
- 8 years as a professional trainer, including VDA-QMC licensed trainer
- Global experience in 20+ countries as a Quality Strategist as an independent consultant

Agenda

- Manufacturing Quality Challenges in 2026
- **What's New in the Summer Release**
 - Operational Intelligence Agents
 - Visual Insights
- Live Demonstration
- ROI and Business Impact
- Q&A

Manufacturing Quality Teams Are Under Pressure

- Auditor shortage and tribal knowledge loss
- Increasing customer-specific requirements
- Slow response time - and tracking - from findings to corrective actions
- Too much operational *data*, not enough operational *insight*
- AI confusion: lots of hype, little practical deployment

This release was designed to solve practical operational problems

Build Your Own Operational Intelligence Agents

- Create organization-specific AI agents from documents or operational requirements
- Upload procedures, policies, standards, customer requirements, or internal methodologies
- Configure and refine agent logic through customizable prompts
- Generate intelligent, context-aware assessments automatically
- Align outputs with your organization's processes, standards, and operational needs

AI Agents with Enterprise Governance and Control

Enterprise-managed AI platform

Centralized management of AI costs, infrastructure, and vendor relationships

Built-in guardrails and governance

Standardized prompts, business rules, and validation controls ensure safe and reliable AI usage

Controlled model and API management

AI models, integrations, and version updates are tested and managed centrally for consistent performance

Secure and compliant by design

Sensitive quality and operational data is protected through enterprise security and access controls

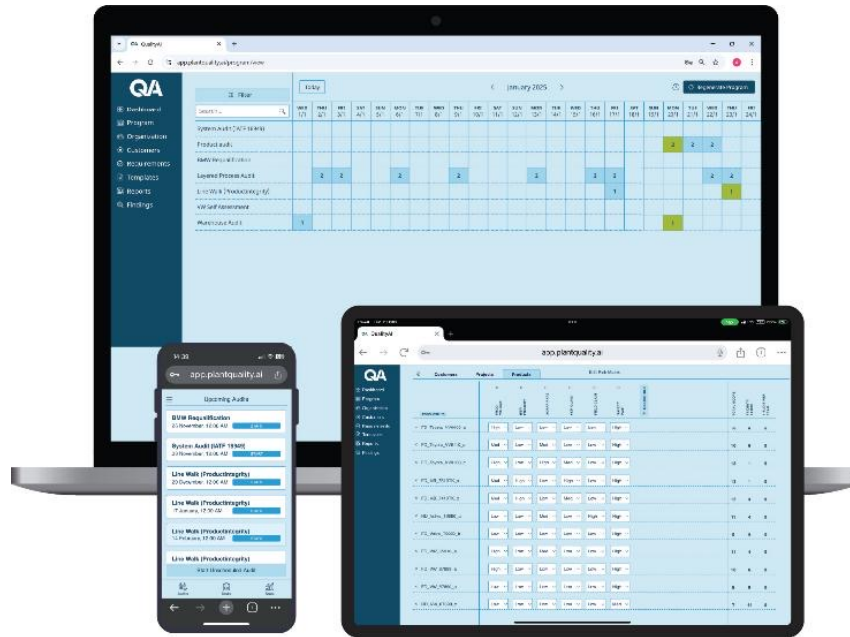

Sustainable user experience

Continuous monitoring and improvement allow users to benefit from AI innovation without added complexity or disruption

Visual Insights Dashboard

- Interactive Business Intelligence style dashboards with real-time filtering and data exploration
- Advanced drill-down capabilities for deeper operational and quality insights
- Flexible reporting views tailored to user needs and business priorities
- Accelerates faster, data-driven decision-making across operations
- Export customized reports to PDF for printing, sharing, and email distribution

Live Demonstration

Return on Investment – Real World Business Case

Business Case for purchasing Quality AI – SUMMARY

Considered saving categories:

□ Reduction in Quality auditing costs:	12 900 USD/year
□ Decrease of External failure costs:	7 600 USD/year
□ Reducing Internal failure costs:	43 800 USD/year
TOTAL EXPECTED SAVINGS:	64 300 USD/year

Cost of Quality AI:

□ Subscription fee:	8 000 USD/year
□ Implementation fee:	1 000 USD/initial installation
TOTAL YEARLY COST including imp. fee:	9 000 USD/year

Return of investment (ROI): **51 days**

Return on Investment – Summary Findings

ACTUAL ROI CALCULATOR DATA

ROI Calculator Results

Median across 28 peer sessions · April – June 2026

Median annual savings **\$47,400**

Median QualityAI investment **\$6,000**

Median net annual benefit **\$41,400**

Median first-year ROI **690%**

Median payback period **46 days**

- All analyzed scenarios achieved excellent ROI performance
- Larger multi-plant deployments generated disproportionately higher savings
- Median payback period was 46 days, median ROI was 690%.
- Audit time reduction and internal quality cost reduction were the primary value drivers.

Q&A Session
